SUMMARY

Front-end Software Engineer with 5+ years building production web applications in React, Next.js and TypeScript for fintech and SaaS platforms, currently on Rate's multi-brand mortgage platform. Experienced with multi-tenant and CMS-driven products, test automation (Jest, React Testing Library, Playwright) and AI-assisted development, owning features end-to-end in remote, distributed teams, including US-based ones. Fluent in English (C1/C2).

PROFESSIONAL EXPERIENCE

Front-end Software Engineer (Contract via Eliassen)
Rate, Chicago, IL, US – Remote 08/2026 to Present

- Develop features on Rate's multi-brand mortgage platform, a single Next.js and TypeScript codebase serving 8+ brands, using Tailwind CSS, Contentstack and Yext.
- Led the integration of the loan officer and branch page redesign.
- Shipped conversion features and accessibility improvements, and wrote and ran Contentstack content migrations across every brand stack.
- Used AI-assisted workflows (Claude Code, OpenCode, GitHub Copilot, MCP) for implementation, code review and migrations, while owning every change shipped.

Key Technologies and Tools: Next.js, React.js, TypeScript, Tailwind CSS, Contentstack, Yext, Jest, Playwright, Storybook, Claude Code, GitHub Copilot

Front-end Software Engineer
Starlight, Fortaleza, BR – Remote 01/2023 to 06/2026

- Developed front-end features for Starlight, a multi-tenant headless SaaS CMS used by dozens of client companies, with Next.js, React.js and TypeScript.
- Delivered 50+ features and UI revamps and resolved 100+ client-reported issues.
- Built an internal analytics dashboard and the company's marketing site from scratch, the latter consuming content from the Starlight CMS API.
- Maintained ~85% automated test coverage with Jest, React Testing Library and Playwright, plus visual regression testing in Storybook.
- Authored developer and user documentation with Docusaurus.

Key Technologies and Tools: Next.js, React.js, TypeScript, Jest, RTL, Playwright, Storybook, Docker

Front-end Software Engineer (Freelance)
Gradily, Fortaleza, BR – Remote 10/2025 to 01/2026

- Consolidated two separate codebases into a unified monorepo, refactoring AI-generated code (reducing bundle size by ~30%) and resolving bugs across a student-facing and a teacher-facing Next.js application.
- Worked on an AI-powered ENEM and SAEB essay grading platform active in 20+ schools across 2,000+ students, processing 5,000+ essays in peak months, with students achieving 14–22% grade improvements, reducing manual grading workload for educators.

Key Technologies and Tools: Next.js, React.js, TypeScript, Claude

Junior Front-end Software Engineer
Klever, São Paulo, BR – Remote 03/2022 to 11/2022

- Built a dozen-plus key features for Kustody, a React and TypeScript crypto wallet custody and management platform handling hundreds of daily transactions.
- Resolved 60+ client-reported issues, improving the UX and speed of wallet transactions.
- Maintained ~80% test coverage with Jest and React Testing Library.
- Integrated the front-end with the Node.js/Express back-end, working closely with back-end engineers.

Key Technologies and Tools: React.js, JavaScript, Node.js, Jest, Next.js, TypeScript

Software Engineering Intern
Universidade de Fortaleza (Unifor), Fortaleza, BR 11/2020 to 11/2021

- Developed full-stack applications spanning React.js, React Native, Node.js, and Unity AR/VR across 5+ projects including healthcare platforms and university recruitment tools.

Key Technologies and Tools: React.js, JavaScript, React Native, Node.js, MongoDB, Unity

SKILLS

Languages & Frameworks: TypeScript, JavaScript, React.js, Next.js, HTML, CSS, Tailwind CSS, CSS-in-JS, Redux, Node.js, Express, React Native
Testing: Jest, React Testing Library (RTL), Playwright, Storybook
Platforms & Tools: Contentstack (Headless CMS), Yext, Git, Docker, Vercel
AI Tools: Claude Code, GitHub Copilot, Cursor, MCP
Practices: Frontend development, Responsive design, Web accessibility (WCAG), REST APIs, CI/CD

EDUCATION

Bachelor of Computer Science
Universidade de Fortaleza, Fortaleza, Ceará, Brazil 01/2017 to 12/2021

- Graduated with academic merit, 3.63/4.0 GPA, ranked first in graduating class.
- 3 years of undergraduate research with yearly published papers (data science, game theory).
- **Bachelor Thesis:** Prismatic Market: The construction and implementation of a TCG (Trading Card Game) commerce mobile application.

PROJECTS

Quick Steam Deals
quicksteamdeals.com | GitHub

- Built a Steam game promotions platform with Next.js and TypeScript, featuring a custom infinite scroll implementation and cached API consumption, deployed on Vercel.

Portfolio
rubensdiniz.dev | GitHub

- Developed a personal portfolio with Next.js and TypeScript, implementing flicker-free light/dark theming and full internationalization, deployed on Vercel.
